

## Extension 3.2 CDE National Parks in Utah

Utah has 5 national parks: **Arches**, **Bryce Canyon**, **Canyonlands**, **Capitol Reef**, & **Zion**.

National parks are preserved because they have some sort of interesting land feature. Your assignment is to research each of the 5 national parks and find out the geological information about how the park was formed. Then, you will create a poster (with the paper provided by your teacher) with the following information:

1. Name of each park (bold title).
2. Picture (drawn and colored) of one famous landform in the park.
3. 3-5 sentences about the geology of how the park was formed.

The following website will be really helpful...

<http://www.nps.gov/state/ut/index.htm>

Click on each national park. Then click on...

- Learn about the park
- Nature
- Natural Features and Ecosystems
- Geologic Formations
