

Physical and Chemical Foldable

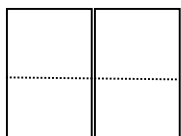

Below are instructions on how to complete the Physical and Chemical Properties and Changes foldable.

Folding Instructions:

1. Take one sheet of blank white paper and fold the two long ends into the center.

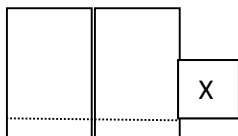

2. Cut both top flaps in half toward the fold. Do not cut the back of the paper!

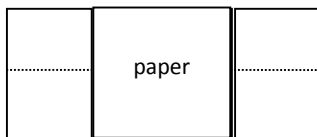

3. Label the top of the flaps in the following manner:

Physical Property	Chemical Property
Physical Change	Chemical Change

4. On the inside of each flap (shown by x), write down the definition..

5. Open up all the flaps. In the center, draw an illustration and write a description below each picture. These should be colored pictures to show a physical property, physical change, chemical property, and chemical change. Make sure your picture matches the flap that covers it.

6. Put your name on the back of the foldable.
